What the news does is literally to put you in touch with the four quarters of the globe, and every day in the year and at every hour of the day.

The advertising has come to be an essential part of the news. It covers the compass of the business world.

It tells of the currents of trade.

It tells where things are made, what they are for, and what they cost.

It deals with facts—facts that concern the well being of the people.

Take it from the standpoint of the advertiser and there is, on the whole, little news in the newspapers that is as important as the advertising.
